

Main window

- This is the main window of Train Ticekt Price Calculator (TTPC) app.
- Here you need to select the customer's destination station. ⁽¹⁾
- Then you need to select the train class.
- Now enter the number of tickets you need to issue. You should enter half and full tickets separately. ⁽²⁾

The screenshot shows the main window of the 'Train Ticket Price Calculator' (TTPC) application. The window has a title bar with the text 'Train Ticket Price Calculator' and standard window controls (minimize, maximize, close). The main content area is divided into three sections:

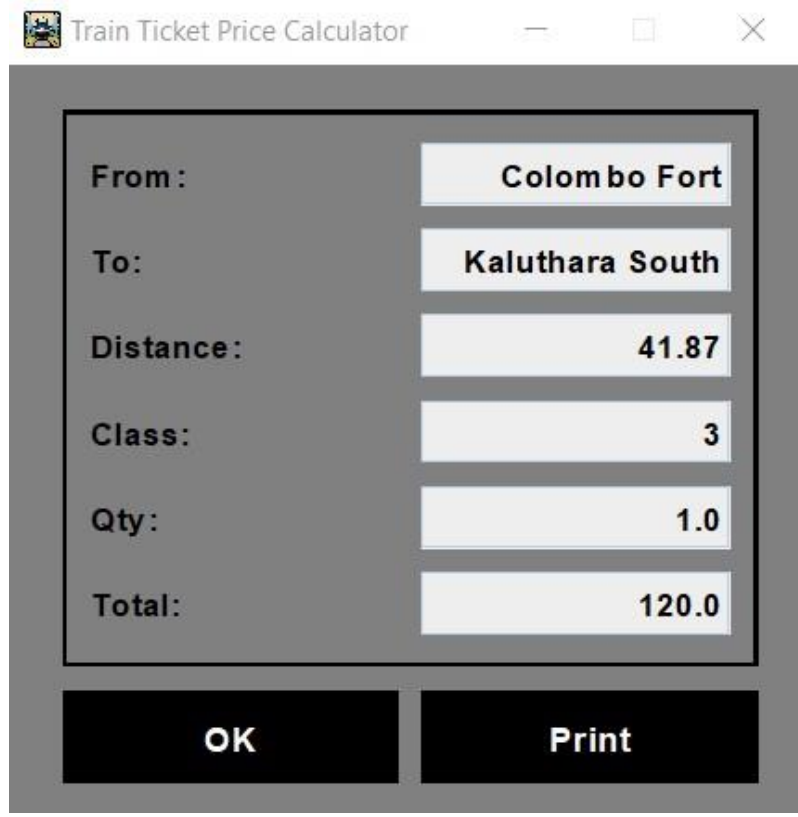

- Destination:** A dropdown menu with 'Agbopura' selected.
- Class:** Three radio buttons for 'First Class', 'Second Class', and 'Third Class'. The 'Third Class' option is selected.
- Amount:** Two input fields labeled 'Half' and 'Full'. The 'Half' field contains the value '0' and the 'Full' field contains the value '1'.

At the bottom of the window, there are four buttons arranged in a 2x2 grid: 'Pay', 'Total', 'Help', and 'About'.

- Then press the **Pay** button to issue the ticket.
- After issuing the ticket you can check them through the **Total** button.
- The other two buttons are **Help** and **About**. About button will show you some details about this app.

Ticket Issuing Window

- You can issue a ticket here.
- Here you can see all selected details for the ticket.
- You can also print the ticket from here. ⁽³⁾

Notes

1. This is a pilot project. So, this app was made for Colombo Fort station as it is the starting station.
2. You must fill in at least one Text Field.
3. This option is still in the testing stage.
4. This will delete the ticket details file and you won't be able to access it again.
