

Main window

- This is the main window of Train Ticekt Price Calculator (TTPC) app.
- Here you need to select the customer's destination station. ⁽¹⁾
- Then you need to select the train class. ⁽²⁾
- Now enter the number of tickets you need to issue. You should enter half and full tickets separately. ⁽³⁾

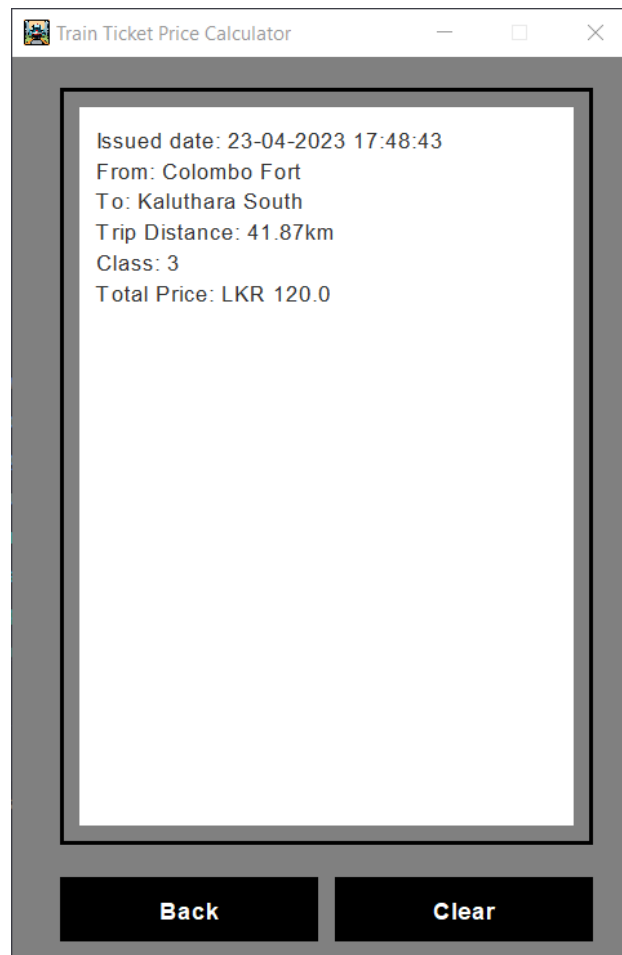

The screenshot shows the main window of the 'Train Ticket Price Calculator' application. The window has a title bar with the text 'Train Ticket Price Calculator' and standard window controls (minimize, maximize, close). The main content area is divided into three sections: 'Destination', 'Class', and 'Amount'. The 'Destination' section has a dropdown menu with 'Kaluthara South' selected. The 'Class' section has three radio buttons: 'First Class', 'Second Class', and 'Third Class', with 'Third Class' selected. The 'Amount' section has two input fields: 'Half' with the value '0' and 'Full' with the value '1'. At the bottom of the window, there are four buttons: 'Pay', 'Total', 'Help', and 'About'.

- Then press the **Pay** button to issue the ticket.
- After issuing the ticket you can check them through the **Total** button.
- The other two buttons are **Help** and **About**. About button will show you some details about this app.

Total Window

- You can view the issued tickets so far.
- You can clear them by pressing the **Clear** button. ⁽⁴⁾

Notes

1. This is a pilot project. So, this app was made for Colombo Fort station as it is the starting station.
2. This app is made for daily service. So, for now 1st class tickets can't be issued through this app.
3. You must fill in at least one Text Field.
4. This will delete the ticket details file and you won't be able to access it again.
