Main window
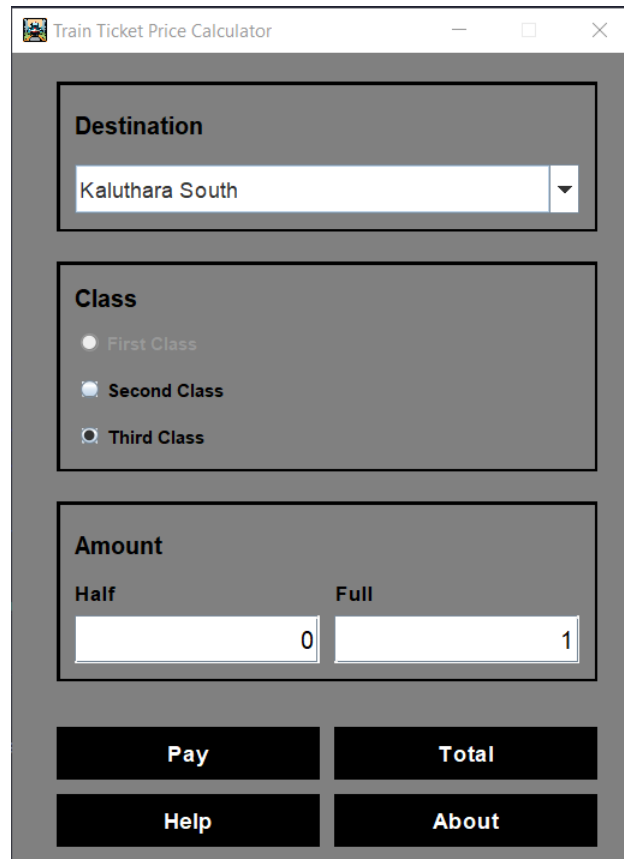

- This is the main window of Train Ticekt Price Calculator (TTPC) app.
- Here you need to select the customer's destination station. [1]
- Then you need to select the train class. [2]
- Now enter the number of tickets you need to issue. You should enter half and full tickets separately. [3]

- Then press the **Pay** button to issue the ticket.
- After issuing the ticket you can check them through the **Total** button.
- The other two buttons are **Help** and **About**. About button will show you some details about this app.

Ticket Issuing Window

- You can issue a ticket here.
- Here you can see all selected details for the ticket.
- You can also print the ticket from here. [4]

- Press the **OK** button to continue the ticket issuing process.

Total Window

- You can view the issued tickets so far.
- You can clear them by pressing the **Clear** button. [5]
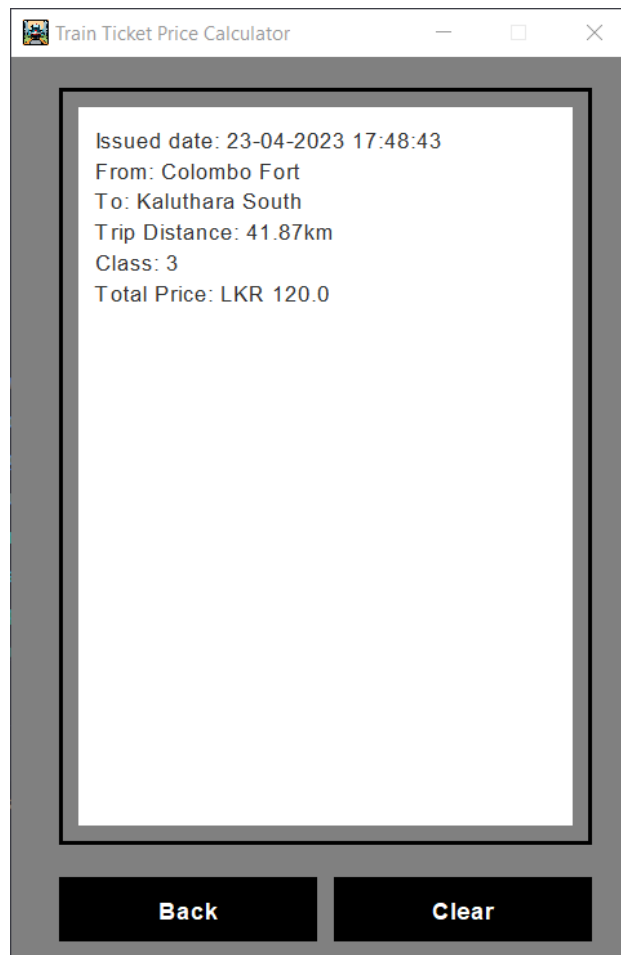

Notes

1. This is a pilot project. So, this app was made for Colombo Fort station as it is the starting station.
2. This app is made for daily service. So, for now 1st class tickets can't be issued through this app.
3. You must fill in at least one Text Field.
4. This option is still in the testing stage.
5. This will delete the ticket details file and you won't be able to access it again.
